Allowable Subject Matter

1. Claims 1, 4-12, 14, 17- 22 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Prior art of reference fails to teach wherein the interior control point being an anchor point interior to the envelope outline and not being a lattice point. The closest reference is Singh (6204860). However only lattice points are used to deform the image. Also, Prior art fails to teach the addition of control points to the original contained object before applying the coordinate remapping. Prior art teaches applying the additional points to lattice first. Also, prior art of reference does not teach determining whether an original curve of the first original drawing object at an original anchor point in the envelope has C1 continuity at the original anchor point and, if it does not, move the anchor point solely according to the coordinate remapping, and if it does, move the anchor point to preserve the C1 continuity in a resulting curve in the resulting drawing object at a resulting anchor point corresponding to the original anchor point.
